REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards an image decompressing method and apparatus. Independent claims 1,9,29,37 and 57-58, identify the uniquely distinct feature, "wherein a decompressing part decompressing given wavelet transform coefficients up to the decomposition level determined by a level determining part, wherein said level determining part determines the decomposition level such that wavelet transform coefficients in the thus-determined decomposition level have a size equal to or nearest to the size of the decomposed image determined by said size determining part"; Independent claims 16,23,44,51 and 59-60, identify the uniquely distinct feature, "wherein a decompressing part decompressing given wavelet transform coefficients up to the decomposition level determined by a level determining part, wherein said level determining part determines the decomposition level such that wavelet transform coefficients in the thus-determined decomposition level have a size further smaller than the size of the decomposition level immediately smaller than the size of the decomposed image

determined by said size determining part". The closest prior art, Chui (USPN 5,909,518), discloses a data processing system and method for performing a wavelet like transformation and a corresponding inverse wavelet like transformation, wherein the wavelet like transformation is performed on input data so as to produce decomposed data; while Hajjahmad et al. (USPN 6,643,406 B1), disclose method and apparatus for performing linear filtering in wavelet based domain, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
